SUMMARY

Frontend Engineer with 5+ years of experience specializing in the *React ecosystem* (Next.js, Remix, TypeScript). Strong background in high-traffic platforms, frontend architecture, and complex migrations. Experienced in owning features end-to-end, working in mono-repo environments, and collaborating closely with backend, product, and design teams in remote-first, cross-functional environments.

WORK EXPERIENCE

TX Services / [20min.ch](#)

August 2024 – present

Frontend Engineer

- Deliver and own production-ready features within a mono-repo architecture, powering multiple high-traffic news platforms with over 1,000,000 daily visits, including [20min.ch](#), [lematin.ch](#), and [lessentiel.lu](#)
- Played a key role in a platform-wide redesign and major frontend refactor, delivering core features such as Dark Mode, In-app Notifications, Bookmarks, and Read Status while reducing overall code complexity
- Built a standalone Radio Widget developed in a separate repository integrated into the main mono-repo app, and implemented a reusable PostMessage API-based tracking pattern for consistent analytics across third-party widgets
- Performed targeted performance optimizations, removing redundant API requests caused by inefficient React effect dependencies, improving overall application responsiveness
- Update and maintain internal npm packages, ensuring compatibility and seamless functionality across the mono-repo codebase
- Participate in code reviews and independently deploying frontend features to production

Peak Software Solutions / [cashload.com](#)

December 2023 – August 2024

Frontend Engineer

- Architected and delivered a standalone reporting and analytics tool from scratch, owning the frontend architecture, project setup, and integration with backend APIs
- Integrated the Nuvei payment provider into a Remix-based e-commerce platform, contributing to a secure, reliable checkout flow for digital products in a production environment
- Worked across three distinct frontend projects with different scopes and maturity levels, serving as the primary point of contact for frontend-related decisions and coordination during active development phases

InterVenture / [gowago.ch](#)

January 2022 – November 2023

Frontend Engineer

- Led a production upgrade from Next.js v12 to v13, resolving breaking changes and ensuring application stability across core user flows
- Integrated Storyblok headless CMS into a large-scale Next.js application, enabling non-technical content authors to manage landing pages through custom, reusable frontend components
- In parallel, maintained and extended a legacy B2B portal built with React, Redux-Saga, and SASS, working with complex forms and business logic

TMS Outsource

October 2020 – January 2022

Full-Stack Engineer

- Contributed to multiple client projects, delivering frontend and backend features in cross-functional teams
- Implemented UI changes and functional enhancements, including third-party service integrations such as Help Scout

EDUCATION

Engineer of electrical and computer engineering (Bachelor appl.)

Graduated February 2019

School of Electrical and Computer Engineering of Applied Studies
